

Midterm

- Implement a Blackjack by using Javascript
 - <https://en.wikipedia.org/wiki/Blackjack>
 - Get 21 points on the player's first two cards without a dealer blackjack
 - Reach a final score higher than the dealer without exceeding 21
 - Let the dealer draw additional cards until their hand exceeds 21
- Player decisions
 - Assign chips
 - Hit - Take another card from the dealer
 - Stand - Take no more cards
 - Double - Double their wager, take a single card, and finish
 - Split - Create two hands from a starting hand where both cards are the same value
 - Surrender - Forfeit half the bet and end the hand immediately

Midterm

- You need to display the cards by using card images
- After a game, the player can play a new game until he loses all chips
- Provide cheat mode to ensure the winning of the dealer
- Use **CSS** and **HTML** to represent your output results
 - You also need to record all of the steps of all games and list the results by using a table
 - Without the table, the grade deducts **30** points
 - Use your own CSS to stylize the table
- Source code comments are welcome
- Array is fine now
- The content and layout will affect your grade
 - Will be reviewed under **Chrome**
- **Delay = Copy = 0**

- Deadline: 11/16 23:30
- TA黃聖凱
 - g110056163@mail.nchu.edu.tw
 - Upload to iLearning 3.0
 - Zip the whole web site!
 - Otherwise your grade will be deducted by 30
- Title
 - 動態網頁程式設計期中_學號_學生名
 - 動態網頁程式設計期中_學號_學生名.zip
 - Otherwise your grade will be deducted by 50
- In the source code, you need to add the identifications below
 - Otherwise your grade will be deducted by 20
