Homework 3

- Implement a Javascript program that reads 8 integers from the keyboard and print them on the webpage
  - Each number is smaller than 1000
    - You need to handle the issue if the input number is larger than 1000
    - Without the code, the grade deducts 20 points
- Parse these 8 integers to find and print
  - Maximum
  - Minimum
  - Median
  - Prime numbers
  - Armstrong numbers, if you copy the code from Wiki, the grade deducts 50 points
    - https://en.wikipedia.org/wiki/Narcissistic_number

Homework 3

- You also need to parse these 8 integers to find and print

  if the integers belong to the integers of the Fibonacci sequence

  - Fibonacci sequence

    - https://en.wikipedia.org/wiki/Fibonacci_number

- Use CSS and HTML to represent your output results

  - At least one table is necessary

    - Without the table, the grade deducts 20 points

- Source code comments are welcome

- As I have mentioned in class, no array is allowable

  - If you use array, the grade will be 0 point

- The content and layout will affect your grade reviewed under Edge

- Delay = Copy = 0

- Deadline: 10/27 23:30
- TA黃聖凱
  - g110056163@mail.nchu.edu.tw
  - Upload to iLearning 3.0
    - Zip the whole web site!
    - Otherwise your grade will be deducted by 20
- Title & file name
  - 動態網頁程式設計第III次作業_學號_學生名
  - 動態網頁程式設計第III次作業_學號_學生名.zip
  - Otherwise your grade will be deducted by 50
- In the source code, you need to add the identifications below
  - Otherwise your grade will be deducted by 20
